Patrick Seeling is a tenured Associate Professor in the Department of Computer Science at Central Michigan University (Mount Pleasant, Michigan, USA). He received his Dipl.-Ing. Degree in Industrial Engineering and Management from the Technical University of Berlin (Berlin, Germany) in 2002 and his Ph.D. in Electrical Engineering from Arizona State University (Tempe, Arizona, USA) in 2005. He was a Faculty Research Associate and Associated Faculty with the Department of Electrical Engineering at Arizona State University from 2005 to 2007. From 2008 to 2011, he was an Assistant Professor in the Department of Computing and New Media Technologies at the University of Wisconsin-Stevens Point (Stevens Point, Wisconsin, USA) and from 2011 to 2015 he was an Assistant Professor at CMU.

He currently leads the Distributed Internetworked Systems and Content (DISC) lab at Central Michigan University, reflecting his research interests comprising networking (with a focus on multimedia and energy optimizations), distributed and mobile systems, and computer-mediated education; applied research and prototypes are typically embodied in smart device and application implementations.

Patrick Seeling has published over 80 journal articles and conference papers, as well as books, book chapters, and tutorials. He serves in editorial and reviewer capacities for different of journals and as technical program committee member for conferences sponsored by several professional societies. Patrick Seeling is a Senior Member of the Association for Computing Machinery (ACM) and the Institute of Electrical and Electronics Engineers (IEEE).

## Education

2002–2005

**Ph.D., August 2005**, *Electrical Engineering*, Arizona State University, Tempe, AZ, USA.

1996–2002

**Dipl.-Ing., December 2002**, *Industrial Engineering and Management*, Technische Universität Berlin, Berlin, Germany.

---

## Thesis Work

**Ph.D. The Rate Variability-Distortion (VD) Curve of Encoded Video**, *Arizona State University*, Tempe, AZ.

Dr. Martin Reisslein

**Dipl.-Ing. Mobile Business-to Business in Implementation, Diffusion, and Development (transl.)**, *Technische Universität Berlin*, Berlin, Germany.

Dr. Marian Scherz

---

## Academic Experience

2015–

**Associate Professor (tenured)**, *Department of Computer Science*, Central Michigan University, Mount Pleasant, MI, USA.

2011–2015

**Assistant Professor (tenure-track)**, *Department of Computer Science*, Central Michigan University, Mount Pleasant, MI, USA.

2008–2011

**Assistant Professor (tenure-track)**, *Dept. of Computing and New Media Technologies*, University of Wisconsin-Stevens Point, Stevens Point, WI, USA.

2007

**Associated Faculty**, *Department of Electrical Engineering*, Arizona State University, Tempe, AZ, USA.

2005–2006

**Faculty Research Associate**, *Department of Electrical Engineering*, Arizona State University, Tempe, AZ, USA.

## Publications

### Publication Highlights

Citation Metrics Citation metrics computed with Harzing's Publish or Perish program freely available from <http://www.harzing.com/> as of August 1, 2015 from Google Scholar source:

- Total citations = 1175
- *h*-index = 17
- *g*-index = 32

Citation metrics obtained directly through Google Scholar from <http://scholar.google.com/citations?user=BUe1aRgAAAAJ&hl=en> as of August 1, 2015:

- Total citations = 1240
- *h*-index = 17
- *i10*-index = 28

ResearchGate My ResearchGate score as of August 1, 2015 is 28.28 (top quintile globally) and I have 79.97 Impact Points.

Journal Publications 33 published or accepted/in print articles in peer-reviewed archival journals.

Conference Publications 50 accepted or published articles in peer-reviewed conference proceedings, 2 presented posters (also published in proceedings).

Other Publications

- One book covering video traces
- Five book chapters covering video, ROust Header Compression (ROHC), and mobile clouds
- One IEEE Communications Society tutorial
- Two demonstrations with undergraduate contributors from Central Michigan University
- Two software tools in IEEE Network magazine

Commercial. Six invention disclosures, one resulting in a provisional patent.

Journal Selected journal rankings with articles published. Presented rankings are the Thomson Reuters Journal Citation Report's Impact factor (I) and 5-Year Impact factor (5I), the University of Washington's Eigenfactor (E) and Article Influence (AI) scores, as well as the SCImago Journal & Country Rank SJR score (SJR) and Quartile (Q). Rankings are current as of September 1st, 2013.

### Student Opinion Scores

Overview Comparative student opinion scores of instructor effectiveness as measured by courses offered at Central Michigan University and the University of Wisconsin-Stevens Point converted to a 5 point Likert scale ranging from 4.00 (highest, strongly agree) to 0.00 (lowest, strongly disagree).

**Total number of students instructed in class: 719**

**Overall weighted average: 3.29 / 4.00**

#### Central Michigan University

Central Michigan University All student evaluations are on a 5 point Likert scale ranging from 4.00 (highest, strongly agree) to 0.00 (lowest, strongly disagree). The provided evaluation results are for the course average and standard deviation in student answers for the 'Overall instructor effectiveness.'

## Evaluation of Instruction and Curricular Development

### Courses and Course Material Developed

- Summer 2015 **CPS530: Mobile Computing**, *Central Michigan University*.  
Course development for a graduate level course that covers multiple facets of mobile computing in the context of current trends and developments. The course focuses on networking, content and resource dissemination, as well as practical implementation aspects using the Android mobile framework as example.
- Spring 2014 **CPS596M: Mobile Computing**, *Central Michigan University*.  
Course development for a graduate level course that uses paper critiques and projects in addition to lectures and discussions.
- Spring 2012 **CPS396M: Mobile Computing: Android**, *Central Michigan University*.  
Course development for an Android OS course that combines introduction to the OS, mobile application development, and with other external services.
- Spring 2010 **CIS460: Advanced Topics in Networking**, *University of Wisconsin-Stevens Point*.  
Developed a new undergraduate course covering advanced topics in networking, such as multimedia and overlay networking. In addition, students are introduced to standards documentations and peer-reviewed scientific publications. The latter two course topics are commonly not part of traditional coursework, yet important for the future professional development of students in business and academic careers alike.
- Spring 2009 **CIS462: Server Administration**, *University of Wisconsin-Stevens Point*.  
Redesigned an undergraduate course covering previously two courses in server administration for Linux and Windows operating systems and web server administration. All material from the previously two courses were re-developed into a hands-on course that is based on virtualization technologies and additionally geared towards distance education students. Using a scenario-based approach following the needs of a small company, topics covered include an introduction to Linux system administration and deployment of network services such as DHCP, DNS, SMTP, SSH, HTTP, and HTTPS.
- Spring 2009 **CIS346, CIS464: Wireless Networks and Devices**, *University of Wisconsin-Stevens Point*.  
Developed an undergraduate course covering wireless network technologies including sensor networks, personal area networks, wide area networks, and cellular networks. The course provides additional introduction of mobility concepts and mobile device characteristics as well as programming introductions to Windows Mobile, Java ME and Android. As part of the course, several additional laboratory-based hands-on modules covering the different wireless technologies were developed.
- Spring 2005 **Computer-based Instructional Module on Principles of Electrical Circuit Analysis for Middle and High School Students**, *Arizona State University*.  
Co-developed and assessed a computer-based instructional module that (i) introduces middle and high school students without any prior content specific knowledge to the principles of electrical circuit analysis, and (ii) has been quantitatively demonstrated to be effective in teaching the basic principles of circuit analysis and to increase motivation for further study in electrical engineering.
- Fall 2004 **Computer-based Instructional Module on Principles of Multimedia Networking**, *Arizona State University*.  
Co-developed and assessed a computer-based instructional module that (i) introduces senior level college students to the principles of multimedia networking in the Internet, and (ii) has been quantitatively demonstrated to be effective in teaching the basic principles of multimedia networking and to increase the motivation for further study in multimedia networking.

### Bachelor and Masters Theses Awarded/Advised

Degrees were awarded to M. Hoppe and S. Haase under a dual degree program between the Department of Computing and New Media Technologies, University of Wisconsin-Stevens Point and the Department of Computer Science, Otto-von-Guericke University Magdeburg, Germany. Student advising leading to M.S. degrees awarded to H. Sundaraman, S. Hiremath, A. Pulipaka, S. Chikkerur was performed under a consulting agreement with the Department of Electrical Engineering, Arizona State University, Tempe, Arizona.
